

# MAGMA

Make A Game, Make Assets

*Last Modified 8/8/2017*

## Purpose

To unite people with a shared interest in game development or interactive programming through game jams.

## Membership

Anyone can be a member, no prior experience is needed. There will be a mailing list containing all members to announce upcoming events, and all who are interested may join any event and become a member of the club.

## Officers and Roles

(El/La/Elle/Lo) Presidente - The person in charge of organizing events, securing spaces, and club finances. Pronoun is determined by the person upon entering the role and may be changed at any time, however it must be a Spanish pronoun.

Other roles will be added as needed.

## Transition Protocol

El Presidente may choose their successor (if this successor accepts), or may choose to hold a vote. Voters must have participated in at least one club sponsored event and must be attending Olin College the following year. The person who receives the most votes and has attended at least one event becomes the new Presidente if they choose to accept. If they do not accept the nomination, the person who receives the next most votes is nominated and may choose to accept the nomination. This process

continues until a nominee accepts their role as Presidente. If no nominee is chosen, the entire process is repeated until a Presidente is chosen.

## **Materials, Purchases, and Spaces**

The club requires a common space (typically the computer lab) for members to participate in game jams. Purchases are made by the current Presidente.

## **Events and Activities**

Game jams. This can include Ludum Dare, the One Hour Game Jam, etc.

## **Amendment Procedure**

Amendments may be ratified by the currently residing Presidente or a majority vote of members who have attended the previous event.

Amendments may be proposed by any member that has attended at least one club event.
